ADDENDUM NO. 1

Request for Proposals – RFP No. 2011-05

Alternative Source of Water Supply Provider

Due: August 31, 2011 at 2:00 p.m. Mountain Time

The following items provide additional information and clarification for the Request for Proposal (RFP No. 2011-05) for Alternative Source of Water Supply Provider, and made part of this Request for Proposal, by issuance of this Addendum. All other requirements, conditions and stipulations in the Request for Proposal remain in force.

In the RFP 2011-05, Section 3.1 the pre-proposal meetings were to be held on August 11 and 12, 2011. However, due to scheduling conflicts, the pre-proposal meetings will be held August 16-19, 2011.

Furthermore the final date to submit Requests for Clarification will be August 24, 2011 with the Final Addenda to be issued by August 26, 2011.

Each Respondent is required to acknowledge receipt of this Addendum by his/her signature affixed hereto and to file with and attached to their Request for Proposal submittal.

Heather Beasley
Water Resources Engineer

ADDENDUM NO. 2

Request for Proposals – RFP No. 2011-05

Alternative Source of Water Supply Provider

Due: August 31, 2011 at 2:00 p.m. Mountain Time

The following items provide additional information and clarification for the Request for Proposal (RFP No. 2011-05) for Alternative Source of Water Supply Provider, and made part of this Request for Proposal, by issuance of this Addendum. All other requirements, conditions and stipulations in the Request for Proposal remain in force.

1. Castle Rock owns 1.4 MGD of capacity in ECCV's northern pipeline.

2. Currently, the type of water allowed to be stored in Rueter-Hess Reservoir (RHR) is limited to Non-Tributary Groundwater and reusable effluent. There is an effort underway to lift that restriction. For the purposes of this RFP, please assume that any type of water may be stored at any time during the year in RHR. Castle Rock owns 8,000 acre-feet of storage in RHR.

3. The anticipated minimum pressure in the Western Line at the E-470 and Chambers connection is 80-130 psi and the anticipated maximum pressure is 210 psi. The elevation of the Western Pipeline at the E-470 and Chambers connection is approximately 5,800 ft.

4. Copies of all project proposals will be distributed to the Town Council members and members of the Utilities Commission prior to the presentations scheduled for September 14th. However, the Council and Commission will not be furnished a detailed staff analysis of the proposals.

5. Below are changes to the schedule listed in Section 3.1 of the RFP:

Anticipated Milestone RFP Schedule	
Proposal Submittal Date	September 7, 2011
First Presentation to Town Council / Utilities Commission	September 14, 2011
Second Presentation to Town Council / Utilities Commission	Mid-October (TBD)

Each Respondent is required to acknowledge receipt of this Addendum by his/her signature affixed hereto and to file with and attached to their Request for Proposal submittal.
