North Meadows Extension to U.S. Highway 85 and Interstate 25

Initial phase: Earthwork and utilities, late 2013

**What you will see starting in early November:**

1. Utility companies moving underground lines to facilitate the new road and future street lighting
2. Surveyors laying out temporary and permanent property boundaries
3. Trucks hauling dirt into the site from the Castle Rock Adventist Hospital property. This earthwork will form the grade up to the bridge that will go over the BNSF Railway tracks
4. Earthmoving equipment such as scrapers, bulldozers, blades and excavators on site
5. Work hours are scheduled for Monday-Friday 7 a.m.-5 p.m.

**What you will see in the future:**

1. Construction of the bridge over the BNSF rail line
2. Construction of additional bridges that will span East Plum Creek, Union Pacific railroad tracks, and U.S. Highway 85
3. Interstate 25 intersection work, including temporary alignments to maintain travel capacity on I-25

**FACTS ABOUT THE NORTH MEADOWS EXTENSION PROJECT**

1. More than 23,611 feet of concrete girders will be erected during construction (about 4.5 miles if laid end to end)
2. There will be more than 15,104 cubic yards of concrete placed in the bridge structures (enough to fill 4.5 Olympic-size swimming pools)
3. Once completed, the 2-mile road will bridge over the BNSF Railway line, East Plum Creek, the Union Pacific railroad line and U.S. 85. It will also intersect with I-25 and will have a total grade change of more than 20 stories.
